SUMMARY

Creative 3D Artist skilled in 3D characters, environments, and VR/game simulations, with expertise in Blender, Substance Painter, Unity, and Unreal Engine. Experienced in delivering seamless workflows from concept to final integration, optimizing assets for high-quality interactive experiences. As a passionate 3D Artist with a strong focus on vehicle and environment design, I am eager to bring my skills in modeling, animation, and technical artistry to your team. My dedication to creating immersive and visually stunning worlds drives me to continuously improve and innovate. I am excited about the opportunity to collaborate with like-minded professionals and contribute to projects that push the boundaries of creativity and technology. Let's create something extraordinary together!

CORE COMPETENCIES

3D Environment Design | VR Simulation | Unreal Engine | Unity | Vehicle Modeling | Photogrammetry | Technical Art | Real-Time Rendering | Rigging | 3D Animation | Sculpting | Modeling | Blueprint (PCG) | UI & UX | Website Frontend

SOFTWARE SKILLS

Blender | Maya | ZBrush | Substance Painter | Substance Designer | 3DF Zephyr | Photoshop | Illustrator | Unreal Engine | Unity | Figma

EDUCATION

Bachelor of Science, Game Design and Development, ICAT Design & Media College, Chennai
2020 - 2023

EXPERIENCE

Designer, L2M Labs Private Limited
JAN 2026 - JUL 2026

3D Artist, Exoplan Technologies Ltd
MAY 2023 - DEC 2025

PROJECTS

Chennai Institute of Technology – Building Strapi website with new ui & ux Design | Web Designer | Developer
I redesigned the Chennai Institute of Technology (CIT) website with a fresh, modern look that reflects its vision for national and international growth. Alongside the website, I worked on building a new CMS system, handling the entire frontend and most of the backend, while independently developing the CMS with guidance from senior team members.

Ashok Leyland – High-fidelity motorcycle-adjacent product visualization for industrial training | 3D Vehicle Artist & Environment Designer
Created realistic truck models and immersive environments for an interactive training simulation using Blender, Substance Painter, and Unity. Captured real-world reference imagery and material samples to ensure photorealistic accuracy in 3D assets.

Apollo Tyres – Safety VR Training | 3D Modeler & Environment Designer
Developed detailed factory environments and machine models for a VR safety module on rubber calendering processes using Blender and Unity.

Vestas – Wind Blade Manufacturing Safety Module | 3D Artist & Animator
Modeled manufacturing setups and created safety procedure animations for an industrial VR training module using Blender, Substance Painter, and Unity.

Apollo Hospitals – VR Exercises & Human Body Operations | Environment Designer
Designed interactive virtual hospital spaces for medical exercises and operational training using Blender and Unity.

In-house Product – Drone Simulator | 3D Environment Designer & Technical Artist
Built realistic terrains and environments, integrated RC controller support with AirSim and PX4, and implemented GIS-based mapping in Unreal Engine 4.
